Commitments and Agenda setting for the next working group meeting in Iceland-Reykjavik – planned for 25 September 2017.

16.00 closing of the working group by working group chair Klas Öberg

Invitation by Klas Öberg to the Risk wg in Tallinn

Dear risk working group,

Welcome to the risk working group in Tallinn, at 10-12am + 2-4 pm the 3rd of July. My suggestion is that we continue the work we have started regarding best performing predictive indicators. Let's start with Quality of management/leadership indicators and then indicators regarding GP's. If we still have time we can have another look on Acute (hospital) care. My idea is that someone presents their work regarding the topic and then we proceed with a discussion about how and why to use these indicators.

Everyone is welcome to join the group but you are supposed to contribute to the discussion. You should have an idea how you develop this work at home after the meeting. If you already have material, please send it to me.

We need two (three) countries to start the discussion by some introduction of each topic: Management, GP, Acute care.

Do you want to participate in the group?

Do you want to introduce one of the topics?

Best regards

Klas
